# TEX COMP™

America's Number One TEXAS INSTRUMENTS dealer.

Proudly Introduces

## THE SALE YOU WAITED FOR

Get a great computer and a great deal. Order software totaling \$99.95 or more from our big selection and get a brand new TI-99/4A Console for only

**\$47.95** With software purchase  
(Reg. 79.95)

+ Ship/Ins/Hand. \*

TEX-COMP, the world's largest supplier of TI-99/4A equipment, has obtained a special purchase on the TI-99/4A console and is passing the savings on to you.

You can protect your investment with a back-up console or introduce your friends and relatives to the finest home computer ever produced—at the lowest price ever!

To qualify for this unheard of price, all you have to do is purchase TI software from our selection in this ad in an amount of **\$99.95** or more and you can purchase the console at this low advertised price.

All consoles are **brand new** and packed with a power supply, RF modulator, user's reference manual and programming manual, as well as a 1-year TI factory warranty.

# LETTERS TO THE EDITOR

## TI-99/4QI CORRECT INFO

CONGRATULATIONS! I was happy to receive the April issue. I wish to correct the info about the TI-99/4QI in the "Letters to the Editor" section. The TI-99/4QI is not a TI code for a specific circuit component and was sold by tens of thousands for over six months.

Let me explain! The 99/4QI is a Quality Improved (hence QI) version of the 99/4A mother board and power supply. On the QI version, many "chips" were integrated into a few and the circuit board layout was modified so that components could be inserted quicker. So we ended up with a computer which was easier to manufacture and superior in quality, but electrically identical to the 99/4A. The 99/4QI was manufactured from August '83 until March '84 and was only available in the beige colored console.

So for all those 99/4A owners tapping the keys of a beige console, you may very well be the owner of a QI.

Richard Payne  
Quality Control Engineering  
Texas Instruments

**P.S.** A quick way to spot a QI console is to examine the RF wiper of the I/O port (the port where the peripherals attach). If the metal RF shield is copper (gold colored), you have a 99/4A. If the shield is silver in color, you have a 99/4QI.

*Thank you so much, Richard, for clearing matters up for us. We appreciate your interest.*

## MICROpendium

In the April issue of Mini-Mag 99, you referred to a publication entitled MICROpendium. I have been trying to locate this publication, but no one in this area has ever heard of it, including the local libraries.

I would appreciate any help you can provide in getting the address of the magazine and/or publisher. I am a TI-99/4A owner and understand this magazine has a lot of information on the TI system.

S.P.S., Lubbock, TX

*MICROpendium is a publication which covers the TI-99/4A and its compatibles. You can subscribe to it by writing to MICROpendium, P.O. Box 343, Round Rock, TX 78680.*

## BLANK PAGE

I am fairly new to the computer field and am constantly looking for easy to follow, layman's terms instructions to accomplish various functions on my TI-99. I have expanded to a P-box Disk system with 32k and RS232. I now have a Star SG-10 printer. When using TI-WRITER, I find that the software causes the printer to form-feed a blank page before printing the text. This wastes paper and I would like to know if there is any way to correct that condition?

D.W.T., Mountain Lake Park, MD

*You can alleviate the problem of paper waste by leaving your printer off until you have entered all of the information in the Fomatter except the final answer to PAUSE AT END OF PAGE? Here, you must enter Y (for "Yes"), and then press Enter. At this point, "WORKING . . ." appears on your screen. Turn on your printer, then push Enter. Your document will begin to print without feeding the extra page first. In this manner, however, you must push enter to print each page of your document.*

*There are two products on the market that replace the TI-WRITER cartridge and eliminate this problem. One is produced by Quality 99 Software, 1883 Columbia Rd. #500 Washington, D.C. 20009 and is called QS Writer. The other is produced by TEX-COMP, P.O. Box 33084, Granada Hills, CA 91344 and is Called 99-Writer II.*

## OOPS!

I think you may have made a little typo in your 99 Puzzle Vol. 1, No. 2. Sixth line from the bottom has "TSST" starting on the fifth letter. Since I could not find the four words that use these letters anywhere else, should they be "RAAR?"

D.S., Kimberly, WI

*You are so right! Sorry about that!*

*Continued on Page 13*

# PLOTTING ON THE TI-99/4A

## Using the Radio Shack CGP-115 Plotter

### Part 2

by Maurice E.T. Swinnen & Thomas Coppens

The manual that comes with the plotter contains a nice example of how to draw pie charts. Although it is written in TRS-80 Basic, Larry Hughes translated it into TI Extended Basic.

The data and the resulting division of the pie chart are purely fictitious. You are free to change the data statements at the end of the program to suit your particular taste. Once you examine the program more closely, you will discover how to modify it in order to change the colors, the striping and the size of the pie.

**Figure 8, Example of Function Plotting.**  
The user may choose the function, the beginning and ending values of X, the axis graduation, the resolution of the graph, the colors, the line types, and the number of functions per graph.

A plotter, in spite of its ability to draw beautiful doodles, soon loses its attraction, unless it can be put to work on something useful. I wanted to see those equations I was forced to compute in college transformed into curves.

The curves can be shown two ways: in *Cartesian form* (on an X-Y axis) and in *Polar form*.

The first one did not pose too many problems in programming, and the second one was easily derived from the first one by modifying lines 170 and 190:

```

170 PRINT #1:"C";COLOR:"L";
TYPE:"M";F(XMIN)*SIN(XMIN)*SCHAAL;"", "- F(XMIN)*COS(XMIN)*SCHAAL :: ON ERROR STOP :: GOTO 180
190 ON ERROR 220 :: XACT =
XACT + DX :: XP = F(XACT)*
COS(XACT)*SCHAAL :: IF
XACT > XMAX THEN 230
ELSE YP = F(XACT)*SIN
(XACT)*SCHAAL :: CALL
AFTOP(YP, -240,240)

```

**Figure 9, Example of Polar Function Plotting.** Comparing this figure to Figure 8, note the completely different appearance of a function such as "SIN (2\*X)/2\*X" in Cartesian versus Polar plotting.

## MINI-MAG 99 NOW ACCEPTING ARTICLES AND PROGRAMS

**MINI-MAG 99** is looking for articles and/or programs that would be of interest to TI-99/4A Computer Owners and Users.

If you have any new ideas or fresh approaches to the use and/or programming of the TI-99/4A, we would be happy to consider publishing your information.

Suggested subjects are: Applications, hardware, software, education, and games, just to name a few.

Manuscripts must be typed double-spaced and, if your article includes a program, submitted with disks or cassettes (you may use both sides). Manuscripts will be returned **only** if accompanied by sufficient first class postage and a self-addressed envelope.

# TI-WRITER

## File Management

By Leslyn Tepper

One of the most important concepts for the TI-WRITER user is that of file management. Good file management will not only save you a lot of time, but it will enable you to become more flexible with your documents.

By using the **.IF (Include File)** command you can combine several different files into one master file for printing.

Perhaps you have files that must be entered in different ways. For instance, some in fixed mode (i.e., charts and tables) and some in word wrap mode (text).

You can set up each portion of your complete document in a separate file, and then, create a file with all of your necessary parameters (margins, headers, footers, indents, justification, etc.) and call, in order, those files you wish to include in the document. The text formatter will do the rest.

The text formatter considers these files to be a single file. Any formatting commands that are currently in effect when a file is called will remain in effect unless the file has its own commands that cover the same options.

It is important to remember that you cannot "nest" the include file commands. In other words, only the master file can call for each file.

You **may not** include a file that has an include file command within *its* file.

You can include a file by either the disk name or the disk drive number, but you must be careful to use the correct name or drive number. If you don't, your file will not be found when it is called, which can create a problem when you need your document to be complete. It's always a good idea to keep a list of your file and/or disk names.

There are three major ways to use the Include File to print out strings of files.

The first is the application of several files because of the length of your document. Perhaps you've written a book or a play and you have saved each chapter in a different file. The overall form, however, is the same, and any text formatter commands will apply to *all* of your files.

Therefore, these common commands can be stated in your main file *prior* to any Include File Commands.

AUTHORIZED DEALER

# TEX-COMP PROUDLY PRESENTS The Second Generation Version of TI-WRITER:

## 99-WRITER II \$19<sup>95</sup>

Tex-Comp now offers a totally new version of TI-Writer with **all** the features of the original TI-Writer **plus** the TI upgrades and a new improved character set and a whole new easy to follow manual. Extended Basic, Editor/Assembler or Mini-Memory loadings, and both series and parallel support. **Available only from Tex-Comp at \$19.95 + S&H**

**SPECIAL:** With order for 99-Writer II, you can purchase Auto Spell (new version 1.1) for **only \$24.95** (Reg. \$34.95)

### SPECIAL OFFER — Free Widget with Editor/Assembler

Buy a genuine TI Editor/Assembler at the regular price of \$38.95, and we will include the Navarone "Widget" cartridge Expander (a \$29.95 value) **FREE**.

WIDGET

**\$38.95 + S&H**

Editor/Assembler Alone **\$19.95**

### SPECIAL OFFER — FREE MINI-WRITER

When you buy a TI Mini-Memory at the new low price of **\$38.95!**

MINI-WRITER

A "mini" word processing program. Requires cassette recorder and TI Mini-Memory Module. Full screen text editing. 24 x 40 character "window," 9500 characters per file, moveable copy, save on cassette or disk, fully compatible with all direct connect printers such as Axiom. A low cost word processing system with professional features!

MINI MEMORY

This software cartridge adds memory to your system. Totals 14K of memory (6K of GROM, 4K of ROM, 4K of RAM). Mini Memory includes a built-in battery, permitting programs and data stored in RAM to be retained even if module is removed from console.

**SPECIAL OFFER**

**TWO FREE Emulator programs with your Modem Purchase!**

**Buy the MARK III Modem at \$94.95 pp**

300 Baud      Optional power supply \$10.95 pp

**OR the VOLKSMODEM XII with 99/4A Cable at \$229.95 pp**

300-1200 Baud Modem complete with cable

**both the TE-II module AND the new TE-IV+ (a \$30 value) at NO EXTRA COST!**

TE-IV+ is the all new super terminal emulator program from **TEX-COMP**. Supports all Baud Rates and can dump to printer or computer. Built-in Buffer. Super fast and easy to use—from STAR SOFT, the creator of the Nibbler. The best 300/1200 Baud emulator program available.

**TEIV+ Available separately at \$19<sup>95</sup>**

**SPECIAL: Compuserve starter kit & 5 Free Hours \$19<sup>95</sup> pp**

**SPECIAL — Source and TEXNET Subscription ONLY \$29<sup>95</sup>** with any modem  
(savings coupon included with modem.)

```

A word of caution should be in order here. This program uses dynamic code modification. This means that the program modifies itself while running.

**So, Rule Number 1: Never make any changes to a program that has been run. Always load down, from disk, a copy of the program, as you typed it in. Never load to disk any program that has been run. Discard it by typing "New" and pressing "Enter."**

So, after you have loaded down a virgin copy and made all the necessary changes, *merge* it onto the disk with

```
SAVE DSK1.MYFILE,MERGE
```

Next *merge* the program from disk into the computer with

```
MERGE DSK1.MYFILE
```

And finally save the program on disk again with

```
SAVE DSK1.MYFILE
```

If you want to be super-careful, and if you find you need to make more changes, save the next version under the name MYFILE1, then next one under MYFILE2, and so on. When you finally have a version you like, save it under the name you

planned to use for it, such as FUNCTION or PLOTTER, or what have you. Then, and only then, discard all those MYFILE versions.

This program has to be entered EXACTLY as printed here. All those LOAD commands poke values into the 32k expansion memory. If you make any change to the program and then run it, before going through the gymnastics I described above, those poke addresses are not situated where they should be and the program will blow up.

Line 100 is especially tricky. There are exactly 127 asterisks to be put in. **NEVER PUT ANOTHER LINE AHEAD OF LINE 100.**

When you try to graph functions on the plotter, you will find out that you will produce a fair amount of "duds." The reason for it is that although the function is an interesting one, you specified limits of X during which the function might just be a flat line.

To save you from jangled nerves and paper, we wrote a function preview program. This program allows you to see (on screen) a list of X and F(X).

Since the screen only holds 24 lines, it will halt when full. Simply press the space bar to see the rest. At the end, you can see the list again or go to a new function (or the same one with new limits).

To use the program, first download from disk a copy of the FUNCTION program. Delete Lines 120 through 560 (if you have PROGRAMMING AIDS III, you can save some time by using the EDITOR program). Type in Lines 120 through 540 as shown in Figure 11.

```

```

*Figure 11, Function Preview Program. This is not a PLOTTING program per se. It allows you to see X and F(X) on the screen before the actual plotting, saving both time and paper. This is NOT the complete program—see text for complete instructions.*

If you are super neat, you might even do a RESEQUENCE here, but the program will work as is, IF YOU GO THROUGH THE SAME GYMNASICS AS EXPLAINED ABOVE.

As you can observe in Figures 8 and 9, the plotter writes, on the graph itself, the function (as you entered it) for each curve. Note that the program does **NOT** recognize implied multiplication. You have to put an asterisk where you want multiplication to occur. Thus

$$2\text{COS}(2\text{X})/2\text{X}$$

should be entered as

$$2*\text{COS}(2*\text{X})/2*\text{X}$$

otherwise the program will halt with an error in line 100 called from somewhere else.

If you want to duplicate, as an exercise, the curves in Figure 8, the entered functions were

$$\text{SIN}(2*\text{X})/2*\text{X}$$

$$\text{COS}(2*\text{X})/2*\text{X}$$

$$\text{SIN}(\text{X})$$

and

$$\text{SIN}(2*\text{X}) + 2*\text{COS}(\text{X})$$

The minimum value of X was -10 and the maximum was 10, while the graduation was .5cm. A resolution of 5 points per cm is usually adequate.

If you want smoother curves, use 10 points per cm. You will have to wait about twice as long for the plotter to finish.

In Figure 9, the functions were

$$2 + 4*\text{COS}(\text{X})$$

$$\text{SIN}(2*\text{X})/2*\text{X}$$

and

$$\text{SIN}(2*\text{X}) + 2*\text{COS}(\text{X})$$

The graduations were chosen 1cm and the limits of X were -6 and 6. In both figures, color and line type can be chosen to match individual taste.

## PLOTTER PROGRAMS

Save yourself the time and trouble of typing in all of the plotter programs that we've printed in the Maurice Swinnen articles for the **Radio Shack CGP-115 Plotter**.

We have put these programs on diskette along with several more of Maurice's programs for a total of 47 plotting programs—23 written in TI Basic and 24 in Extended Basic.

You can even list each program for closer examination—an aid to making the most use out of your **TI-99/4A and the CGP-115**.

- **No typing errors**
- **No debugging**
- **47 programs on 5 1/4" disk**
- **Just load and run**

Send for your "Plotter Disk" today! Send check or money order for \$5.00\* (plus \$2.00\*\* shipping & handling) TO:

## TI-WRITER

*Continued from Page 8*

**.FO Page %0(CR)**  
**.IF DSK2.FILE1(CR)**  
**.IF DSK2.FILE2(CR)**  
**.IF DSK2.FILE3(CR)**  
etc.

If your files have no common parameters, and perhaps go in and out of Fixed Mode, include your text formatter commands in each file and simply use your Master File to call each file in its proper order:

**.IF DSK2.FILE1(CR)**  
**.IF DSK2.FILE2(CR)**  
**.IF DSK2.FILE3(CR)**  
etc.

Finally, if you have several different documents that you wish to print out without having to enter the formatter for each one, you simply set up a Master File to Include each file in the printing.

### DATA FILES

Another great technique to save you a lot of time is using what I call "Data Files."

This technique is used while you are in the Text Editor. If you are going to input a document that goes from one setup to another (fixed mode with one set of margins to word wrap with another set of margins), you can first set up two data files with the specific Format Commands required for each section and save each to disk.

When you come to the point in the document where you need to enter this information, simply merge the file into your text buffer.

To do this you go into the Command Level (Function 9) and enter LF (load file), enter the line number in the text buffer after which the file is to be merged, a space, and the

filename of the file to be merged, then press enter.

This is a terrific aid because you don't even have to set up these files in advance. You can be typing in your document, come to a portion that you feel you will need to use several times and, at that point, save the portion you want to use in a *data file*.

Go into command level (Function 9) and enter SF (save file), then type the number of the first line you wish to save, a space, the number of the last line you wish to save, a space and any valid filename.

These are just a few ways of saving you time and keeping your files more organized. Whether you wish to print a portion of a document or the entire thing, you will have a better grip on how to do it with good file management "under your belt."

## LETTERS

*Continued from Page 3*

### PEB MODIFICATION

In reviewing the articles contained in the March '85 issue of Mini-Mag, I found I had a couple of questions regarding the P-Code Problems article by W.R. Moseid.

Mr. Moseid indicated two solutions to improving ventilation and reducing noise level for the PEB.

1. "Replace existing fan with fan from TI Professional Computer." Is there a part number that can be referred to? Any modifications to TI-99/4A PEB?

2. "Cut a circle out in the PEB and place a wire shield in the hole." Where should the hole be cut? What size hole?

Thank you for your cooperation and assistance in this request.

R.L.S., Louisville, KY

*Since those recommendations were received, I was advised by a TI exchange center that any modification will void the warranty and may even prevent out-of-warranty exchange. If noise or cooling is a real problem, you should remove the fan, take it to an electronics surplus store, and look for one of the same voltage that is more efficient and quieter.*

*Continued on Page 27*

# TEX+COMP™ Proudly Introduces

America's Number One TI computer retailer

## ATTENTION TI OWNERS,

By special arrangement with Texas Instruments and Adventure International, TEX-COMP offers the entire 12-volume series of Scott Adams' Adventure for the TI-99/4A Home Computer at a special package price of only \$49.95. Save hundreds of dollars off the original suggested retail price. The Scott Adams Adventure Series, produced for every major brand of home and personal computer, is recognized as the leading name in adventure gaming.

You only need the TI-99/4A (or 99/4) console and a tape recorder or disk drive storage capability. Insert the TI Adventure Module\* into the console and load the particular game

you want to play from cassette or disk. You are transported to another time and place where two-word commands allow you to manipulate objects and perform acts as if you were actually there. The object of each game varies as the games themselves do. It may take hours, days or even months. Like a good novel, you can lay it down and then continue where you left off. Save the game on cassette or disk and then recall it.

TEX-COMP makes TI adventuring inexpensive and exciting, and offers complete supporting products—TI Adventure Command Module, only \$6.95, and the Official Scott Adams Adventure Hint Book, only \$7.95.

### BE SURE TO SPECIFY DISK OR CASSETTE WITH YOUR ORDER!

## THE ADVENTURES . . .

- #1 **ADVENTURELAND** — Wander through an enchanted realm and try to uncover the 13 lost treasures. There are wild animals and magical beings to reckon with as well as many other perils and mysteries. This is the Adams Classic that started it all! Difficulty Level: Moderate
- #2 **PIRATE ADVENTURE** — Only by exploring this strange island will you be able to uncover the clues necessary to lead you to your elusive goal — recovering the lost treasures of Long John Silver. Difficulty Level: Beginner
- #3 **ADVENTURE #3** — In this exciting Adventure, time is of the essence as you race the clock to complete your mission in time — or else the world's first automated nuclear reactor is doomed! If you survive this challenging mission, consider yourself a true Adventurer! Difficulty Level: Advanced
- #4 **VOODOO CASTLE** — The Count has fallen victim to a fiendish curse placed on him by his enemies. There he lies, with you his only possible hope. Will you pull off a rescue, or is he really down for the Count? Difficulty Level: Moderate
- #5 **THE COUNT** — It begins when you awake in a large brass bed in a castle somewhere in Transylvania. Who are you, what are you doing here and WHY did the postman deliver a bottle of blood? Difficulty Level: Moderate
- #6 **STRANGE ODYSSEY** — At the galaxy's rim, there are rewards aplenty to be harvested from a long-dead alien civilization, including fabulous treasures and advanced technologies far beyond human ken! Prepare yourself for the incredible! Difficulty Level: Moderate
- #7 **THE MYSTERY FUN HOUSE** — As Adventure #7 begins, you find

- yourself hopelessly lost in the middle of a carnival fun house. While escape may elude you, one thing is very clear — you're NOT here to have a good time! Difficulty Level: Moderate
- #8 **PYRAMID OF DOOM** — This is an Adventure that will transport you to a dangerous land of crumbling ruins and trackless desert wastes into the PYRAMID OF DOOM! Jewels, gold — it's all here for the plundering — if you can find the way. Difficulty Level: Moderate
- #9 **GHOST TOWN** — You must explore a once-thriving mining town in search of the 13 hidden treasures. With everything from rattlesnakes to runaway horses, it sure ain't going to be easy! Includes a special bonus scoring system too! Difficulty Level: Advanced
- #10 **SAVAGE ISLAND PART I** — A small island holds an awesome secret — will you be able to discover it? This is the beginning of a two-part Adventure. (The story continues in SAVAGE ISLAND PART 2: ADVENTURE #11.) NOTE: This one's a toughie — for experienced Adventurers only! Difficulty Level: Advanced
- #11 **SAVAGE ISLAND PART II** — The suspense begun in Adventure #10 now comes to an incredible conclusion with SAVAGE ISLAND PART II! This Adventure requires you to have successfully finished #10, wherein you were given the secret password to begin this final half. NOTE: For experienced Adventurers only! Difficulty Level: Advanced
- #12 **GOLDEN VOYAGE** — The king lies near death in the royal palace. You have only three days to bring back the elixir needed to rejuvenate him. Journey through the lands of magic fountains, sacred temples, stormy seas and gold, gold, GOLD! This one is for experienced Adventurers only! Difficulty Level: Advanced

## ADVENTURE HINT BOOK

Our hint book provides clues and solutions to help you out of those sticky spots you have gotten into, while still enabling you to solve the Adventure yourself. So if you can't seem to get out of the bog, or locate the Pharaoh's heart, then you've come to the right place for help. This edition includes hints for all SCOTT ADAMS Adventures 1 - 12. There is also a special section on the making of Adventure Maps. For those that just want answers, there is a solution section, too. But don't worry. All clues and solutions are specially encoded so that the only time you can get a clue or answer is when you want one.

Buy now and SAVE Hint Book . . . . . \$7.95

**ALL 12 ADVENTURE PROGRAMS  
PLUS 1 NEW BONUS ADVENTURE**

**ONLY \$49.95**

**ON CASSETTE OR DISKS**

**Never Before Pricing!**

# Adventure Series

Programs for Texas Instruments Home Computer . . . by SCOTT ADAMS

## EXTRA VALUE BONUS

WITH EACH ADVENTURE SERIES ORDER ON CASSETTE OR DISK, TEX-COMP IS INCLUDING THE LATEST ADVENTURE FROM EUROPE . . . "KNIGHT IRONHEART" . . . WHICH SELLS FOR \$9.95 IN THE BIG TEX-COMP CATALOG . . . (REQUIRES MODULE)

### TI ADVENTURE COMMAND MODULE

This module is required to use the games advertised on this page. If you do not already have it, it may be purchased from TEX-COMP for only \$6.95.

**Adventure Module PHM3041 . . . . . \$6.95**

### RETURN TO PIRATE'S ISLAND

The sequel to Pirates Adventure is now available from TEX-COMP on a self contained module with graphics!

**PHM3189 . . . . . \$11.95**

The M-99/8A*

## ADVENTURE EDITOR

**29<sup>95</sup>**

add 3.00 shipping and handling

**NOW WRITE AND EDIT YOUR OWN GAMES  
FOR THE TI ADVENTURE MODULE!**

TEX-COMP is proud to announce the 9914A Adventure Editor—an all new program which allows you to write your own adventure programs—Scott Adams move over! This disk or cassette based program allows:

1. Any existing adventure for the 'Adventure' command module to be edited, altered, listed, and copied from any storage medium to any other storage medium (i.e., tape to disk or vice versa).
2. New adventure games can be created freely, using a 'template' game as a start-up step. These games can be conceived using the full power and capabilities of the TI 'Adventure' command module.

The program is written for 'Mini-Memory' or 'Editor-Assembler' command modules (cassette or disk) and offers a full screen editor and a special easy-to-use, mnemonic language called A.P.L. (Adventure Programming Language), and comes with a complete and detailed 75-page manual. TEX-COMP is also organizing a new TI Adventuring Users Group which will allow low-cost exchange of user-written adventures between members.

# WHY FORTH?

## *The Pros and Cons of the Forth Language, From the Standpoint of Someone Who Doesn't Use It.*

by Jim Ness

During the last few years a number of relatively new programming languages have been fighting for the limelight, calling themselves the most user-friendly thing to come around since Jody Foster in Taxi Driver.

The big claim is always

**“... WITH THE SPEED OF ASSEMBLY LANGUAGE, BUT THE EASE OF BASIC.”**

Nice try. Nothing is as fast as assembly language, and few are as easy as Basic.

But my experience with Forth has convinced me that a language can come close to fulfilling those promises. I am not going to go into a big spiel about “Threaded Interpretive Languages” which would be tough to understand.

Let me put it this way, for those of you who have used assembly language called from a Basic or XBasic program, the closest thing to a Forth-type language would be a Basic program that has lots of CALL LINK statements in it.

Each Forth command, or “Word,” is represented in the computer as a group of assembly language routines.

Each routine has its own word to represent it, call a “Primitive.”

A useful Forth command is built by “threading” a number of primitives together. You end up with one word that really represents a bunch of simpler words.

Forth remembers all your definitions in a “dictionary,” so it is always able to know what you are asking it to accomplish.

The point of all this explanation is to show that there is a lot of overhead—a lot of back-checking that has to be done for each upper level Forth word that is executed.

Therefore, no, it is not as fast as an assembly language program that is designed to do the same thing.

But it IS fast. Faster than Pascal, MUCH faster than Basic, even the compiled Basic available for the TI. Now, to confuse you even more, it is SLOW!

TI-Forth only holds 5k of program in memory at one time. Sound small? Actually, if you come up with one Forth word that represents, for instance, a word processor program, all you need is that one word as your whole program. Who needs lots of memory?

The fact is, most of the memory is taken up by the dictionary, to remember all of your definitions. You must load in your entire dictionary to run the program.

That's called “compiling” a Forth program. And for a complicated program, it can be very time-consuming.

So, say you decide to run your Forth word processor. You crank up the computer and expansion box, put your Editor/Assembler or Mini-Memory cartridge in, put your Forth disk in, and Load and Run “DSK1.FORTH.”

In about 15 seconds, the program has SCRN 3 loaded (SCRN 3 is supposed to be the auto-loaded screen, so if you want a program to crank right up, you put the beginning there).

Now, it starts compiling. If all

your definitions do not fit onto SCR3 3 (1k of memory), your words in SCR3 direct Forth to the next screen. The disk drive loads another.

For a long program, you may be waiting for a good deal of time, while screen after screen gets loaded and compiled.

This is the slow part of the Forth language. Since Forth was designed to work with small computers, it uses the disk drives a lot to store info, instead of computer RAM.

It can be very distracting to have to put up with waiting for the disk drives to do their stuff. I hate it. I also hate the manual. I also hate making a boo-boo, and having to turn off the computer and reload the whole thing because of a program lock-up.

But there ARE advantages to Forth.

Forth gives you much better access to the video display area of your computer. You can use all 4 display modes with Forth.

- The standard graphics mode
- 40-column text mode
- Multicolor mode
- Bit-Graphics mode

You also have more control of peripherals—faster file access; ability to use modes of file handling not available to Basic programmers; much faster arithmetic routines, both floating point and 8/16/32 bit numbers; and faster loops, for instance count to 10,000 in a loop in about 5 seconds.

Why not program in a Forth version of assembly language. It runs at Forth speeds, but uses a vernacular similar to real assembly language.

In short, Forth allows you to do anything that CAN be done on your machine, anything that you could do in assembly language. The difference is just speed.

If you are familiar with assembly language programming, and are

comfortable using it, then Forth is a waste of your time. You can come up with assembly language routines that are cleaner and faster than the same in Forth, and with about the same amount of effort.

If you don't feel comfortable with assembly language, but want to get more out of your machine, try Forth.

Don't expect to learn Forth as fast as you learned Basic, but with a little work, you should be able to do some unbelievable things.

The TI manual leaves a lot to be desired. Remember that TI released this product after they announced their withdrawal from the market.

The product was not yet finished. So the software has a couple of bugs, and the manual is not a friendly piece of literature. There is a disclaimer at the front of the manual.

If you are really interested in Forth, there is also an independent product out produced by WYCOVE.

## DISK FIXER

Unlocks the secrets of the disk and lets you access hidden or "lost" information. \*See important module notice below.

## SUPER- DUPER

Safeguards masters fast. \*See important module notice below.

## SPEED READING

Improves reading speed and comprehension. Versions for children, teens, and adults. Cartridge Software, no extra equipment required.

Version A for teens and adults. Version B for children 8 through 13. \*See important module notice below.

## HOMEWORK HELPER

Makes homework fun, develops basic computer skills. DISK DRIVE REQUIRED. \*See important module notice below.

## CONSOLE WRITER

Turns your console into a word processor without disk-drive memory. With just your console, a printer and this unique cartridge program you can begin word processing today. Features include a full screen text editor that lets you Insert and Delete characters and complete lines. The program is extremely easy to use yet powerful enough to handle most home word processing applications. \*See important module notice below.

## DATA BASE MANAGER

A customized transaction, filing and reporting system for the small business with new improved manual. This comprehensive program controls customer activity, organizes inventory, and tracks business transactions. It allows you to develop and organize your files, design your own screens, customize data entry and index information by multiple keys. A powerful sort utility will organize entire disk files in any sequence by up to six keys. The Navarone Data Base Management System (DBMS) is a series of programs modules designed to provide powerful yet low cost Data Base Management capabilities for the TI-99/4A Home computer. This series of programs are written entirely in Assembly language in order to exercise the full power of your 16 bit computer. The Navarone Data Base Management System is the most powerful data base system available on the TI-99/4A home computer. You can create data bases with up to 25 fields with 32000 records. (record size is limited to 255 bytes). Use the Data Base Management system to keep track of inventory, customer files, or stamp collections. DISK DRIVE REQUIRED. \*See important module notice below.

## PAINT N' PRINT

Create works of art by using the full color palate of your computer and the 32 different brushes available on PAINT N' PRINT. Special features allow you to magnify small sections of your picture for detail painting and move sections of your painting anywhere on the screen. \*See important module notice below.

Print hard copies on your color printer or just save on a cassette or disk. Requires joystick or Rollerball controller and printer (See note).

NOTE: This program is compatible as sold with the Axiom GP100, GP550, or GP700 color printer. For compatibility with other dot matrix printers, including Star & Epson, an additional expanded graphics disk is required at \$19.95.

**IMPORTANT NOTE:** Module programs will not run on 1983 V2.2 Consoles.

Check your title screen for compatibility.

## Astrology-Horoscope Maker

# 9900 + FOR THE TI99/4A THE ULTIMATE 99/4A EXPANSION SYSTEM AT A SPECIAL INTRODUCTORY PRICE FROM TEX-COMP™

## COMPLETE EXPANSION SYSTEM NOTHING ELSE TO BUY!

TEX-COMP, the undisputed leader in supplying the 99/4A User, has now put together the finest and most complete expansion system ever offered for the TI99/4A.

Based on the new COR-COMP 9900 System,  
you receive the following:

- **9900 Expansion Box & Regulated Power Supply (UL Approved)**
- **32K Memory Upgrade** Adds 32K bytes of Random Access Memory to your system.
- **Double Sided/Double Density Disk Controller** (operates up to 4 drives)
- **RS232 Interface** Lets you add a wide range of other accessories, such as printers or telephone modems, one parallel and 2 serial outputs.
- **1 SS/SD Disk Drive** Allows you to store and retrieve data on 5¼-inch single-or doubled-sided floppy diskettes.
- **1 Disk Drive Case & Regulated Power Supply**  
Handles two ½-height drives easily (UL or LAC Approved)
- **New Disk Manager with Improved Disk Utilities**
- **All Cables & Instructions** Including a free TI RS232 Y-Cable. Plus S&H

# ALL FOR \$449.95

For above system with upgrade to 1 DS/DD ½-height TEAC 55B Drive, ADD \$24.95  
For above system with upgrade to 2 DS/DD ½-height TEAC 55B Drives, ADD \$154.95

Other Leading TEX-COMP Hardware Values:

TI-99/4A Console w/1 year warranty (add \$20 for Black & Silver Model)	79.95
New Star SG-10 Printer w/TI Instructions (replaces Gemini 10X same specs but improved letter quality)	249.95
Axiom Parallax TI Interface (Directly connects any parallel printer to 99/4A)	79.95
Parallel Printer Cable (Heavy duty, TI approved)	24.95
Cor-Comp RS232 Card (for TI P-Box)	79.95
Cor-Comp 32K Card (for TI P-Box)	99.95

## The Complete TI Scholastic Spelling Set

Special Offer  
**\$19.95**

### Complete Set (all 4 modules)

An incredible Software offer from TEX-COMP.  
Scholastic Spelling Levels 3, 4, 5 & 6

Scholastic Spelling is a complete spelling library of grades 3-6 with each module containing about 600 high-usage spelling words with three challenging and exciting spelling games for each word.

This series was developed for Texas Instruments by the leading educational firm, Scholastic, Inc.

This 4-module and 4-volume instruction book series retailed at \$219.80 when introduced in 1982. **TEX-COMP** has them all and is selling this entire set at the unheard of price of

**\$19.95**

### Speech Synthesizer Required

The above 4 modules are designed to work with the TI Speech Synthesizer so that all lesson words are pronounced.

**TEX-COMP** has the TI Speech Synthesizer PHP1500 for only **\$74.95**. These are the latest improved versions (1984) and come with a full TI warranty.

Each Scholastic Spelling Module (3,4,5 & 6) available separately at **\$9.95** each.

**Others Give You  
Promises, Promises, Promises**

**WE DELIVER . . . the best data base management software available**

Start by using all the power of the TI-99/4A computer with the new Data Base Manager from Navarone. Our new revised DBM System now has a completely re-written 26-page manual that guides you through each powerful DBM module Step-by-step. The new DBM System can be used to handle up to 32,000 records, with up to 25 fields of variable length in each record. (255 bytes maximum record size).

Look up any record with lightning speed by any field you want. Sort up to 32,000 records, limited only by disk space. Up to 6 nested sort keys with special select feature for coded records. DBM has the easiest report generator known. You can design your own custom reports by a special built-in editor.

**WE DELIVER . . . the best customer support available**

We want you to get all the benefits from your TI-99/4A by using our new DBM System. When you get this new organizational tool, we will help you make it work. If you have any problem with this new DBM System just call or write to our CUSTOMER SERVICE Center and chances are one of our experts will be able to help you start using this powerful program immediately.

**WE DELIVER . . . the best customer satisfaction guarantee**

When purchased from us, after using this product for 30 days you are not completely satisfied, simply return the Data Base Manager, and we will refund your full purchase price.

**ONLY \$69.95 (includes shipping)**

TO ORDER: MASTER/VISA CARDS Welcome. Send Cashiers Check or M.O. or personal check (allow 10 days to clear), to Navarone Industries, Inc. 19968 El Ray Lane, Sonora, CA 95370, or call (209) 533-8349. CA Residents please add 6 % Sales tax. Outside US add \$5.00 for Shipping.

# TID-BYTES TO WET YOUR APPETITE

## RIDGE SERVICES

RIDGE SERVICES, 170 Broadway, Suite 201, New York, NY 10038 has three rather interesting pieces of software to offer the TI-99/4A users:

**Personal Social Register** is an advanced computerized name, address, and telephone directory developed for the TI-99/4A. It combines menu-driven commands with an array of sophisticated user functions to produce an automated social event director. Reminding you of upcoming events in plenty of time to send out cards, gifts, etc., Personal Social Register is directed to busy professionals and anyone with large families or lots of friends and requires a disk system, memory expansion and X-Basic for \$35.

**Personal Inventory Program (PIP)** is a unique household cataloger which stores complete details on all personal possessions. Its menu-driven commands make this a versatile yet simple program. In the event of a casualty, PIP will be able to supply all of the details required by Insurance Companies, Police Departments, and the IRS. Although the diskette version is faster, PIP is also available on cassette and requires X-Basic for \$20.

**Pro Football Analyst** is a proven system for choosing both NFL and USFL winners against the point spread and is offered in BASIC. With a win rate of 66.3%, Pro Football Analyst excels in office football pools and Total Point selections. It takes 5 minutes a week to

analyze a complete slate of games with statistics obtained from your local newspaper. Available on cassette or diskette at \$34.95.

## JOY PAINT 99

**JOY PAINT 99** is among the newest releases from Great Lakes Software, 804 E. Grand River, Howell, MI 48843. Joy Paint 99 will be similar to the popular MacPaint. Joystick or keyboard controlled, Joy Paint 99 contains utilities that allow the user to draw lines, circles, boxes, fill shapes with different patterns, type text on the screen, save to disk and make a full page printout. The retail price planned for Joy Paint 99 is \$29.95.

Currently, Great Lakes Software offers a **Extended Business Graphs**, a menu-driven program for creating statistical graphs of your choice. After you input the specific data you wish to be charted, Extended Business Graphs compiles the data and produce either a bar graph, pie graph or line graph on your screen. It allows the user to save the information on the program disk to compile future graphs and/or direct the program to print the desired graph. Extended Business Graphs requires 32k memory expansion, X-Basic and one disk drive. \$29.95

## TE-4PLUS

**TE-4PLUS** is a high speed terminal emulator written in assembly language offered by TEX-COMP, P.O. Box 33084, Granada Hills, CA 91344. Full menu-driven protocol

setup is implemented, including port number, baud rate (110-9600), parity, stop bits, data bits and full or half duplex (local echo). Further setup is provided for screen and text colors, file system record length, and automatic linefeed. Incoming text may be saved (downloaded) in a 24k circular buffer, that can be dumped to disk, printer, or any other device, with user-selected record length (1-254) and optional filtering of linefeed and other control characters. TE-4Plus also has the capability to upload text files from a disk drive to the RS232 port, and to simultaneously send incoming text to a printer, 80-column card, or other peripheral. In addition, TE-4Plus has a true lowercase character set built in. TE-4Plus requires 32k memory expansion, one or more disk drives, RS232 interface with modem, and either the Extended Basic, Mini-Memory or Editor/Assembler cartridge. It sells for \$19.95.

#### *NEW FROM QUALITY 99*

Quality 99 Software, 1884 Columbia Rd. #500, Washington, DC 20009, has added a few new items to their catalog.

**QS-Writer** allows you to run the TI-Writer disk without the TI-Writer module. The purpose of this program is to save the user time, the need to swap modules, and wear and tear on the console. Extended Basic, Editor/Assembler or Mini-Memory is required. Retail for \$39.95 (\$44.95 with TI-Writer files included).

**QS-Converter** will convert a text file into a runnable program. The user creates or modifies programs using the editing capabilities of TI-Writer and can then convert the text file into a runnable TI Basic or Extended Basic program. QS-Converter will also convert files downloaded from a BBS into a runnable program. Disk, 32k and Ex-

tended Basic are required to run QS-Converter, which retails for \$39.95.

**The Duplicator** is intended to aid the user in "backing up" program disks. The Duplicator copies in 2 passes for Single Sided/Single Density disks and 4 passes for Double Sided/Single Density Disks. It works with 1 or 2 drives and verifies the copy disk. The Duplicator has been developed to work with both TI and CorComp controllers and requires 32k with either Extended Basic, Editor/Assembler or Mini-Memory with a retail price of \$19.95

#### *MICROSTUFFER*

Microbits Peripheral Products, 225 Third Avenue, SW, Albany, OR 97321 has introduced the **MicroStuffer Printer Buffer** to the computer market. MicroStuffer will receive print data at rates up to 8000 cps and send it to the printer at its own print rate, freeing the computer for the next job. Its 64K will hold approx. 45 pages of double spaced text, and since it has its own power supply, it continues to hold data even if the computer or printer is turned off. A built-in repeat function allows the user to print up to 255 copies of the data in the buffer's memory. Parallel or optional RS232 Serial interface is available. Retail is around \$139.95.

If you know of any plans for new products, send details to:

# NOTES

---

## *TEXAS INSTRUMENTS IS OUT*

Tex-Comp announced that it has just completed negotiations with Texas Instruments to purchase large quantities of the most popular TI-99/4A Software.

In consumating this transaction, Tex-Comp has acquired TI software with a retail value of well over a million dollars, which will enable it to continue to supply the TI user for years to come.

Texas Instruments, as of April 1, 1985, is officially out of the home computer business and in selling this remaining inventory to Tex-Comp has, in effect, transferred its responsibility of supplying the TI user.

One TI official stated that while limited amounts of TI software may still remain for a few selected titles at various mass merchandisers, this final transaction has placed one of the largest quantities and best selections of TI software available anywhere.

## *BEIGE CONSOLE PROBLEMS*

It seems that the I/O port on the side of the beige console is giving some TI-99/4A users a problem.

When attaching some third party hardware to this port, the connection inside the console gets bent (due to misalignment). As long as everything is still working, that's not really a problem.

It has, however, been brought to our attention that Texas Instruments Service Centers are not

honoring warranties on consoles that have been damaged in this way, because of the use of third party equipment.

## *SERVICE CENTERS ONLY!*

Any problems with or returns of Texas Instruments hardware or software must be taken to your local Texas Instruments Service Center along with proof of purchase date if under warranty.

Replacements and/or repairs will be done at the centers. You may not take the merchandise back to the dealers for any replacement or repair. Again, this is for Texas Instruments brand items only.

## *DEVELOPMENT OFFER*

In an attempt to expand the software library available for the Texas Instruments Professional Computer, John Schier, Manager of TIPC Marketing, is seeking out those of you who are software developers.

“. . . in exchange for active members making software they develop available for the TIPC, we will offer them software developers' discounts.”

The qualifications are that the developer must be an active member of a user's group, must have participated in a 99/4A Users Group Software Exchange Program, agree to submit one program for the TI Professional to a User Group within 12 months of purchase, and not resell any equipment purchased through this discount offer within 12 months of purchase.

John Schier said, “We believe this is an outstanding opportunity for User Group members to expand their personal computing capability.

Anyone who is interested in such an offer can contact John Schier, Texas Instruments, Inc., P.O. Box 2909, Austin, Texas 78769.

# ENTER ROUTINE

by Maurice E.T. Swinnen

While translating the prompting of some European programs from Dutch, French and German into English, my eye caught a neat "ENTER" routine I hadn't seen before. It must be popular in Europe, as it was used in several of their programs.

After the first screen displayed the explanation of how the program worked, the usual message "PRESS 'ENTER' TO CONTINUE" was displayed at the bottom of the screen. The unusual thing was that the word "ENTER" was flashing on and off—putting emphasis on the word.

It is done very simply. The word "ENTER" is blanked out periodically by five blank spaces, as is shown in Line 1030.

The "ENTER" routine itself, which starts in this demo program at Line 1000, is a subroutine and may be called as many times as you want in your program.

Needless to say, this demo program is written in Extended Basic.

```
100 CALL CLEAR :: DISPLAY AT(6,1):"  
  This is a new ENTER routine." :  
  : DISPLAY AT(10,1):"Would you l  
  ike to try it?" :: GOSUB 1000  
110 CALL CLEAR :: DISPLAY AT(15,1):  
  "Works nice, huh?" :: END  
120 REM  
130 REM  
1000 REM *ENTER ROUTINE*  
1010 DISPLAY AT(24,1):"Press ENTER t  
  o continue." :: FOR X=0 TO 10 :  
  : CALL KEY(0,Y,2):: IF Y=13 THE  
  N RETURN  
1020 NEXT X  
1030 DISPLAY AT(24,2):"      ";%5 spa  
  ces  
1040 FOR X=0 TO 10 :: CALL KEY(0,Y,2  
  ):: IF Y=13 THEN RETURN  
1050 NEXT X :: GOTO 1000
```

Simulating this routine in TI-Basic is not difficult at all, in spite of the fact that "DISPLAY AT" is missing in that language.

We can use the "DISPLAY AT simulator," whose paternity (or maternity in some cases) has been claimed by many programmers. By modifying that simulator (Lines 10010 through 10100) slightly—adding the five-spaces-blanker (Line 10110) and a single CALL KEY statement that allows responding to an ENTER-key press (Lines 10120 through 10140)—we end up with a routine that is even more attractive and just as fast as the one written in Extended Basic.

It has one more advantage. It can be used in both TI-Basic and Extended Basic, although it's a little slower executing in the first one.

```
100 CALL CLEAR  
110 PRINT "THIS IS A NEW ENTER ROUTI  
  NE":::::  
120 PRINT "WOULD YOU LIKE TO TRY IT?"  
  ":::::  
130 GOSUB 10000  
140 CALL CLEAR  
150 PRINT "WORKS NEAT HUH?"  
160 END  
170 REM  
180 REM  
190 REM  
200 REM  
10000 REM *ENTER ROUTINE*  
10010 ROW=23  
10020 COLUMN=6

### DATABIOTICS

I am responding to your March, 1985 issue of MINI-MAG 99 on Page 22 and 23. There is an article on plans for a company called "DataBioTics." You mentioned a few pieces of software that I'm interested in getting. However, you did not include an address for the company. Please send me an address for the company.

D.G., Cherry Hill, NJ

The address for DataBioTics is:

DataBioTics  
P.O. Box 1194  
Palos Verdes Estates, CA 90274

### "EXTRA" PARTS

My compliments on your new magazine and continued support to all TI-99/4A users. I have a few questions of importance to both readers and users:

1. Why does the cartridge port on the console heat up after being in use for a couple of hours; and does this hurt anything?
2. What of any of the supposed expanded TI-99/8, is it a rumor or truth? Do you have any inside information?
3. Why did TI sell all of its "extra" parts for the TI-99/4A to Radio Shack? Wouldn't it have been to TI's advantage to keep these parts for service in its service facilities or centers?

A.H., Harbor City, CA

Good questions! I'll answer each one by number:

1. The power supply for the console is located directly below the area of the cartridge port. It does not hurt anything, provided that the area surrounding the vent slots is not blocked. If you are really worried about it and wish to cool it down, there a couple of things you can do. Since the power supplies on the beige console runs cooler, and there are several of these power supplies available at computer surplus stores, simply replace your power supply with this cooler one. Another thing would be to use a small muffin fan next to your computer, with the air blowing over this portion of the console.
2. The expanded TI-99/8 is primarily rumor, although a handmade prototype may be built to encourage investors. People "in the know" don't feel that a 99/8 would be a commercially successful product, due to the unavailability of software and the current market conditions.

TI made a few 99/8 prototypes—the most famous is one owned by Don Bynum, a former TI engineer who has displayed it at a number of user group functions.

Tex-Comp, a 99/4A retailer has recently constructed several prototypes of advanced TI-

99/4A computers, but does not feel that a retail market would support mass production.

3. In regard to the "extra parts," TI only unloaded components that it felt it had in "more than enough" quantities to support ongoing service & warranty replacement.

### SPANISH CHARACTER SET

I am most impressed with your articles on the TI-Writer, and would like to ask for some help. I have had untold hassles with the TI-Writer and Impact Printer's instructions regarding typing out in the Spanish Character Set. In fact, the only program in the TI Impact Printer Manual that didn't work on my Epson compatible Manesman Tally Spirit 80, was the one for software switching to the Spanish Character Set. My wife works for PTA in two schools that are heavily Hispanic, and desperately needs something compatible with the TI-Writer that will do this in software—any help available?  
M.V.L., Santa Monica, CA

*I am not personally familiar with your particular printer nor the availability of the complete international character set within its functions; however, by simply using the Transliterate Function in your TI-Writer, you should be able to solve your problem.*

*For instance, at the beginning of your Spanish document insert the following Transliterate Commands:*

.TL 92:110,8,126

.TL 94:8,39

*The first one will change the reverse slash key (ASCII Code 92) into an "n" with a tilde above it (n, backspace, tilde). Therefore, every time you push the backward slash in your document, you will create an "n."*

*The second one will replace the circumflex with a backspace and an apostrophe (thus an accent over either the a, the e, or the i, whichever precedes this key).*

*With only two commands, you have all you need for the Spanish language since there are only those two differences from English.*

*On the other hand, if you do have access to an international character set within your printers commands (check your printer's manual), you simply access the set by use of an escape sequence to whatever your printer calls for.*

*For instance, to access this character set on the Gemini, Epson and Panasonic printers, you would Transliterate some key into an escape key, then use the escape sequence called for:*

.TL 95:27,55,7

*This turns the Underscore key into the necessary escape sequence.*

# Sensational Prices!

**33251 STAR MICRONICS SG-10 PRINTER . \$259.00**  
 Latest model! Draft quality at 120 cps, near letter quality at 30 cps. 2k print buffer.

## THE 99¢ DISKETTE!

Are you paying too much for diskettes? Try our first quality, prime, 5 1/4" diskettes (no rejects, no seconds) at these fantastic sale prices and save, save, **SAVE!** Disks are packaged in boxes of 50; each box contains 5 shrink-wrapped 10-packs that include diskettes in sleeves, labels, and write-protect tabs.

Each diskette is certified to be 100% error free and comes with a lifetime warranty (if you have a problem, we'll replace the diskette). All diskettes include hub reinforcement rings and write-protect notch.

	Box of 50	
<b>32391 SS, DD Diskettes</b>	<b>\$49.50</b>	
	<b>(99¢ each!)</b>	
<b>32403 DS, DD Diskettes</b>	<b>\$74.50</b>	
	<b>(\$1.49 each!)</b>	

Just plug the Super Sketch graphics pad into the cartridge slot on your TI 99/4A, follow the super simple instructions, and you'll be drawing a picture in about 60 seconds! Draw in 16 colors...also includes texture option. Built-in commands make drawing easy. Save your drawings on cassette.

**32437 Super Sketch** **\$44.95**

## SKETCH-MATE

The perfect companion for Super Sketch, Sketch-Mate allows you to save your artistic creations to disk and print them on an Epson-type printer (including RX-80, Gemini 10X, SG-10, etc.). Includes easy-to-follow manual. Requires Super Sketch, 32K, disk drive, Cartridge Expander (see opposite page), and Editor/Assembler, OR Extended BASIC, OR Mini-Memory.

**33617 Sketch "Mate" - disk** **\$29.95**

## BEST SELLERS from QUALITY 99 SOFTWARE

**DRAW 'N PLOT.** Create and print drawings, graphs, designs and illustrations in incredible detail and with Assembly Language speed! Mix text and graphics, set background and line color, draw circles, fill, erase. Save to disk or print on Epson, Gemini and compatible printers. Includes 8 plotting commands. Requires 32K, Extended BASIC, joystick. Sug. Retail \$39.95  
**32582** **\$34.95**

*Created with Draw 'N Plot*

**DISK MANAGER III.** Lose your Disk Manager? Stuck with Disk Manager I? Need resident disk functions? This resident disk manager program puts the most frequently used Disk Manager commands and functions in memory, ready for instant use. Provides disk catalog, initializes a disk in any format, changes disk and file names, etc...All from command mode without disturbing your program in memory, and without using Disk Manager module! Requires 32K, Extended BASIC. Sug. Retail \$39.95  
**32703 Disk** **\$34.95**

**EZ-LOADER.** Automatically reads disk catalog...then loads and runs any program with just one keystroke! Requires 32K, Extended BASIC Sug. Retail \$19.95  
**30339 Disk** **\$17.95**

**SDUMP.** Fast, resident screen dump program. Requires 32K and Extended BASIC OR Editor/Assembler. Sug. Retail \$19.95  
**32718 Disk** **\$17.95**
